

Corporate Quality Policy

We hold an important position as a supplier to our strategic markets and by meeting our customers' requirements and expectations; we want to be perceived as trustworthy and customer-oriented supplier of quality products seeking a zero-error delivery rate.

We strive to improve this image by constant improvement and development in all areas and aspects of the business to supply our customers with first class products on time.

We are an ISO9001-2000 and AS9100 accredited company and the Quality Management System has been structured to comply with the requirements with a commitment to continually improving its effectiveness.

The established Quality Management System has the full support of senior management and each employee is hereby instructed to follow instructions and defined operating procedures, and is responsible for carrying out their duties correctly.

Objectives for both Quality-related and other general improvements shall be set annually and progressed toward completion, which is monitored on a monthly basis until formally reviewed at the Management Review.
